A heat accumulator is a double tank structure composed of an inner container 1 and an outer container 2 made of stainless. The inner container 1 and the outer container 2 are integrated by welding an outer periphery of a mouth 3 of the inner container 1 to a mouth 3' of the outer container 2.</p>

JPP10-86644	April 7, 1998	<p>which is the entrance of a cooling water to the inner tank 11a, is integral with the lower center portion of the inner tank 11a. Also, a lower end of the outer tank 11b is welded to a side wall surface of the mouth cylinder 13 and is positioned with respect to the inner tank 11a.</p> <p>A housing 20 is bolted to the outer tank 11b via a stay 15 welded to the outer tank 11b. While maintaining the state, the mouth cylinder 13 (opening end 13a) of the tank body 11 is fitted to the housing 20 via an O-ring 16 and the fitting portion is sealed using the O-ring 16.</p> <p>In case of mounting a heat storage tank to a side member, if the heat storage tank is not collapsed in the case of a vehicle collision, the heat storage tank tends to reinforce the side member. Therefore, there is caused a problem that the side member does not function in the case of a car collision.</p>

		<p>The present invention has been accomplished to solve the above problems. It is an object of the present invention to provide a heat storage tank, which has a tank body which has a high strength while is likely to be collapsed in the case of a car collision.</p> <p>In a heat storage tank 5, a container body 20 of which is a double tank structure comprised of an inner container and an outer container, a plurality of grooves 10a, 10b, the directions of which are one, are formed on an upper surface and lower surface of the inner and outer container.</p> <p>The heat storage tank 5 is attached to the side member 8 using brackets 9a, 9b, 9c so that a shaft A vertical to a vehicle travel direction is inclined at an angle θ with respect to the grooves 10a, 10b direction.</p> <p>This makes the heat storage tank 5 collapsible in both of a forward direction and a forward left direction.</p>
